

Neighborhood Scavenger Hunt

The plants on this list are special! They are native to California, which means they are adapted to CA's climate and need little to no extra water in the dry summer months. Native plants are a great choice for the garden because they save water and also provide critical habitat and food for birds, butterflies, and beneficial insects.

Grab this list and let's get started! How many of these plants can you find?

Scoring

Plants = 1 point, Bees = 1 bonus point, Butterflies = 2 bonus points, Hummingbirds = 3 bonus points

					Score Card Plants: Bees: Butterflies: Hummingbirds: Total points:
<p><i>Arctostaphylos den. 'Howard McMinn'</i> Howard McMinn Manzanita</p>	<p><i>Ceanothus 'Concha'</i> Concha California Lilac</p>	<p><i>Clarkia amoena</i> Farewell-To-Spring</p>	<p><i>Corethrogyne filaginifolia v. californica</i> California Corethrogyne, CA Aster</p>	<p><i>Epilobium canum</i> California Fuchsia</p>	
<p><i>Eschscholzia californica</i> California Poppy</p>	<p><i>Eschscholzia californica 'Red'</i> Red California Poppy</p>	<p><i>Fragaria chiloensis</i> Coastal Strawberry</p>	<p><i>Iris douglasiana 'White'</i> Douglas Iris</p>	<p><i>Lupinus bicolor</i> Annual Lupine, Bicolored Lupine</p>
