Hello CRS Supporter,

Our Joyful Moment of the Month took place at Grant Elementary in Richmond as our CRS team brought a "STEM Day at the Beach" activities for 500 kids!

Kindergarteners delighted in stretching out colorful nylon ropes across the schoolyard to discover how big marine mammals from otters to giant blue whales are, while 3rd graders built "driftwood" structures from paper dowels and engineered foil boats to transport toy bears.

See joyful learning in action and read reflections from teachers, volunteers and students all in [our 2023-24 Impact Report](#) .

I love seeing that students from all over the Bay Area experience the joy of science because of CRS. Each year, my science instruction becomes stronger and I realize how much science was missing from my own elementary experience! Thank you!
--1st Grade Teacher, San Leandro

Community Resources for Science

Empowering educators & scientists to engage young learners in wonder, exploration & discovery

Building Belonging through Joyful STEM Learning

I love CRS! They are my go-to for anything science related. Because of CRS, I went from not wanting to teach science, to it becoming my favorite thing to teach! -- Oakland 3rd Grade Teacher
