Hello Corinn,

Asian American & Pacific Islander Appreciation

May is AAPI month. CRS has compiled a [list of science-themed story books about notable Asian And Pacific Islander scientists and engineers](#), including many that show how childhood curiosity set the stage for later discoveries. Teachers can highlight these books to foster students' own sense of belonging in science, and invite students to imagine how their own interests might lead to fascinating careers that involve science and engineering. Almost all careers of the future will require scientific literacy – even in fields such as entertainment, sports, fashion, and cuisine, along with more traditional “STEM” jobs.

Survey time! Response enters you in our prize drawing!

When school lets out for the year, our CRS team shifts into overdrive, reviewing your feedback, evaluating our impact, and gearing up for the next school year. Your input helps us to understand how your needs are changing so we can design and bring you the information, programs, and support that will be most useful to you!

Please take a few minutes to fill out this [brief survey](#) to help us understand your goals and needs around science, engineering, and climate literacy teaching and learning for the coming school year.

Plus: You might win a prize just for sharing your thoughts! We'll draw names from responses submitted by May 17 for gift cards (three will be awarded!).

Take the Survey

Sincerely,

Corinn and Everyone at CRS
