Hello CRS Supporter,

Gathered on a summer morning in a verdant, colorful garden abuzz with pollinators, the 20 teachers in our newest cohort of peer coaches eagerly shared with one another stories of what joyful science learning looks like in their elementary classrooms. During the multi day Joyful Math and Science summer training, these teachers developed their own mini-workshop to coach fellow teachers on how to combine science and math into joyful learning experiences that help students see themselves as belonging in STEM. Each newly minted peer coach will support 5 teachers in the coming school year -- impacting learning for 3,000 children and 100 teachers!

One teacher exclaimed: "I'm so excited to share what I've learned, and to get more kindergarten teachers to discover how powerful joyful science learning can be for their students!"

**Help double the number of joyful
science moments in classrooms
this school year with our special
CRS Board matching opportunity -
- extended to the end of July!**
